STICKER FILE SETUP GUIDE

Ai

Sticker Printing is a Pay-for print service where we provide adhesive vinyl which you can print your design onto. The machine can also cut out your design from the vinyl surface. Types of vinyl we carry are : GLOSS WHITE / MATTE WHITE / CLEAR GLOSS

Files are processed during the Weekdays ONLY

Once your file is approved and purchase has been confirmed your sticker will be printed within 2 to 5 business days.

1. Set up your file on **Adobe Illustrator**

   Create an artboard with the **Width of 28 in** **Height of X in**

   - X being the height of your design, you can change this later

   Make sure to change ~~the color~~ mode to **RGB Color**

   28 inches is the default sheet width & 6 ft (72in) is the max print length

   If your file exceeds 72 inches in length, split your design and make a new artboard in the

FILE SETUP

2. Once you open the new file make 2 layers and name them in the following order : **CUTLINE | DESIGN**

The **CUTLINE** will contain **Stroke (1pt) in Hot Pink** (or anything close to it) where the machine will cut out the vinyl layer of the sticker (Optional) (Backing will be intact)

The **DESIGN** will contain your artwork

If you want more copies of your file
tile your artwork across the artboard
Since you are
PAYING BY THE INCH IN HEIGHT
make sure to spread it sideways to minimise costs

Once you have completed your file make sure that you create outlines for all your text
(Type > Create Outlines) this ensures that your typeface is preserved when sending your file to be processed.
