

# 3D Printing with Clay

## Using the PotterBot Micro

## Introduction

- The PotterBot Micro is located in the 3D Lab
- Usage process follows normal 3D printing consultation protocol
  - Make an appointment to meet with a technician
  - Go over print strategy during consultation
  - Submit to queue
  - Pay for material by print volume (\$0.05/cu in.)
- Clay printing will take place on Thursdays
  - In alignment with bisque firings in Wet Shops (Tuesday)
  - Student may observe, but only technicians operate machine
  - Prints will be transported to Wet Shops within one day of printing
- Pilot testing program begins Spring 2024
  - Currently open to staff and faculty only
  - Student access will begin Fall Semester 2024
  - Must have **both** clay and 3D printing authorizations
  - Please direct access requests to:
